Education

Master of Science in Engineering - Computer Science and Engineering

Lunds Tekniska Högskola, Lund — **August 2022 - Present**

- M.Sc in Engineering, Computer Science and Engineering with specialization in Machine Learning.
- **Coursework:** Data Structures and Algorithms, Functional Programming, Object-oriented Programming, Concurrent Programming.

Work Experience

Proton — Geneva, Switzerland

Software Engineering Intern — **June 2026 - August 2026**

- Developed **localization** end to end in **Python** for the **Proton VPN Linux** app, using **gettext** and **Crowdin** across 23 languages.
- Implemented **U2F/FIDO2** hardware key authentication in the **Proton VPN CLI**, extending two-factor login beyond **TOTP**.
- **Takeaways:** Internationalization at scale, authentication protocols, open-source contribution, privacy-first engineering.

Spotify — Stockholm, Sweden

Software Engineering Intern — **June 2025 - August 2025**

- Software engineering on the mobile platform, developing **Share to Instagram Notes** and **Share to LinkedIn**.
- Contributed to features bringing in **1 million** new users and **1.5 million** account reactivations per month.
- **Takeaways**: Large-scale software development, user engagement strategies, working in a fast-paced and data-driven product team.

Axis Communications — Lund, Sweden

Student Software Developer — **March 2025 - May 2025**

- Software development in **C#** and **.NET** ensuring ONVIF Profile S compliance for Axis' Video Management System.
- Gained insight into **large-scale software architecture** and tackled **complex integration** challenges between systems.
- **Takeaways:** Enterprise level development in .NET and C#, Visual Studio, Firebird database, Agile/Scrum methodologies.

Mercedes-Benz — Malmö, Sweden

IT-Technician — **September 2024 - March 2025**

- Installed and configured software on over **200 laptops** and **400+ company phones** across Sweden and Denmark divisions.
- Provided technical support to office staff, troubleshooting hardware, software, and network issues to minimize downtime.
- **Takeaways:** Improved technical troubleshooting skills, efficiency in software deployment, time management and prioritization.

Lunds Tekniska Högskola — Lund, Sweden

Teaching Assistant — **March 2024 - March 2025**

- **Discrete Structures** in Data Science, Programming in **Scala**, Programming in **Python** and **Data Structures** and **Algorithms**.
- **Takeaways:** Examination, teaching skills, ability to communicate problems and solutions.

Coding Projects

Find the Fraud — Swift | SwiftUI | Objective C | TypeScript | Firebase | Google AdMob

- Developed and deployed an **iOS** guessing game, achieving **top 17** in Board Games on the App Store **within 24 hours** post-launch.
- Revenue through **Google AdMob**'s Ad-program. Swift, Objective C and Javascript backend. SwiftUI frontend. Firebase as database.
- Launched on the App Store and amassed over **8.1k impressions** and over **1.7k downloads** in less than **12 months** after launch.

Golf AI Model — Python | PyTorch | Scikit-learn

- Built a **convolutional neural network** that classifies professional golf players based on player, video angle and golf club.
- Reached **90% accuracy** and **94% top 3 accuracy**, with over **3000** labeled videos and **50+ players** scraped from multiple sources.
- Designed and developed scraping pipeline, video labeling tool, training loop and comparison tools.

CLI based VPN application — Bash | Wireguard | Tor

- Built a fully automated, privacy focused **VPN** system using **Wireguard** and **Tor**.
- Enables secure, anonymous and low cost personal **VPN routing** possible across the globe.
- Designed deployment scripts, country-switching automation, client configuration and Tor-layer integration.

Extracurricular activities

Elite Ice Hockey Player — 2015 - 2022

- Elite ice hockey in Frölunda Academy during gymnasium and later relocated to the US to play in the NAHL.
- Won **Gold** in the J18 Swedish Championship and **Silver** in the U16 Swedish Championship.
- **Takeaways:** Leadership, teamwork, time management, coordination, continuous improvement, high-performance mindset.

Skills & Interests

Coding Languages

- Python, Swift, Java, Scala, Objective C, C#

Developer Tools & Frameworks

- PyTorch, Scikit-learn, Firebase, Git, GitHub, Jenkins, Spring boot, SwiftUI, .NET

Interest & Hobbies

- Swinging golf clubs, cooking asian cuisine, amateur fishing and ice hockey.
