EDUCATION

M.Sc.Eng. in Computer Science - *Lund University, Faculty of Engineering (LTH)* Aug 2022 - June 2027

- Currently pursuing a Master's degree in Machine Learning.
- Exchange semester at Pontificia Universidad Católica del Perú.
- Relevant courses: Machine Learning, Artificial Intelligence, Language Technology (NLP), Advanced Algorithms.

PROFESSIONAL EXPERIENCE

Accenture - *New Associate, Data Engineering, Management & Governance* Nov 2026 - Dec 2026

- Proposed a cost-efficient AI solution to a client's data quality problem, designed to minimise token usage.
- Building a human-in-the-loop AI workflow in Power Automate that corrects or flags data errors.

SAAB - *Summer Intern AI & Data* June 2026 - Aug 2026

- Delivered two projects from research and prototyping to final implementation in an agile team.
- Processed and analyzed large datasets to automate annotation, replacing a process previously requiring 5 employees.
- Accelerated AI simulations by developing software using statistical and computational methods.

We Know IT - *Fullstack Consultant* Jan 2026 - Present

- Co-built Pingly, an AI assistant app with live stocks, sports and news, from the first line of code to App Store launch.
- Sole developer and technical contact for a client, leading weekly meetings to align on priorities and progress.
- Worked across the full stack in fast-paced projects with frequently changing requirements, keeping delivery on track.

Lunicore Student Consulting - *Software Development Consultant* May 2025 - Sep 2025

- Developed Go backend functionality for an application, enabling secure and reliable payment processing.

Lund University - *Teacher Assistant, Algorithms and Data Structures* April 2025 - July 2026

- Assisting and examining students on laboratory assignments and coding projects.
- Gained deeper knowledge of advanced algorithms, time complexity and dynamic programming.

SATS - *Assistant Site Manager* Aug 2020 - Aug 2022

- Led a team of 25 people in daily operations and drove consistent improvements in performance.
- Increased customer satisfaction by 30% and sales by 8%, achieved through analyzing customer behavior.

PROJECTS & EXTRACURRICULAR ACTIVITIES

Lund AI Society Aug 2026 - Dec 2026

- Building an agentic RAG workflow that helps a non-profit make decisions based on its own data, in a team of 5.
- Focusing on output reliability: assessing answer credibility and making results more deterministic.

ML Classification Model for Golf Swings Planned release: Dec 2026

- Trained a pose-based classifier on swing motion from 50+ professional golfers, 90% top-1 accuracy held-out.
- Compared CNN, residual CNN and TCN architectures in PyTorch with custom normalisation and augmentation.
- Evaluated with class weighting, balanced test sets, learning curves and per-class F1 to check for data bias.

iOS Applications 2025

- Worked in Swift, Javascript, Objective-C and Firebase to create multiple online applications.
- Currently has over 2,000 downloads and reached the Top 15 on the App Store's board game rankings.

Introduction Program Coordinator - *Lund University* 2023 & 2024

- Planned and led the department's orientation weeks for 200+ new students and 70+ volunteers.

SKILLS

Programming Languages

- Java, JavaScript, Python, Go, Swift, Scala, Objective-C, R, SQL

Tools & Frameworks

- PyTorch, NumPy, scikit-learn, Firebase, Git, NoSQL, Jenkins, Google Cloud, Data Lakehouse, Agile Programming
